

Perennial caulescent herb

Apocynaceae (Dogbane Family)

Phenology: flowering April and May; fruiting May and June.

Management Responsibility: BLM (AZ Strip Field Office).

Synonym: *Cycladenia jonesii* (Eastwood), Welsh & Atwood

Similar Species: a montane California taxon, *C. h. venusta* has longer petioles.

Notes: BLM has monitored Arizona populations since 1993. There appears to be no viable seed production.
